This is a fantastic idea. I have close family who have their lives back after an injury because of the benefits of CBD from cannabis. The simple fact is 9/10 people who are opposed to this idea have zero to little education on the matter. Alcohol attacks every cell in the body when consumed all 216 of them. Cannabis effects 1 when consumed. The fact that this is even up for a debate is simply ludicrous when a far more harmful substance is so openly accepted. I trust the right decision will be made based on facts not feelings. Thank you

Tyler Keehn.
