Treasure Cove Casino (Prince George, B.C.) - Structural Change Application

The attached application reflects a new construction project that is being added to the existing Casino to increase the seating capacity of the Show Lounge from the current 200 seats to a total of 1000 seats. The new show lounge will require liquor primary approval to our current licence.

Attached are floor plans of the area under consideration and a letter from the City of Prince George confirming they do not issue occupancy loads. As there will be an increase in occupancy, the City has been provided with a copy of this application for their follow-up.

Thank you for your continued assistance and please do not hesitate to contact me if there is anything additional that is required.

Yours truly

Steven Leach  
Consultant for Treasure Cove Casino
