We strongly oppose the approval of allowing the construction of a second residence on this property. This will definitely be setting a precedent which will have a negative impact on all the home owners in the Valleyview subdivision. When the applicants sell their property, this will likely turn into a rental home. There are other ways the applicants could successfully deal with their situation and that is, add a basement suit or build an addition on the house. We have lived in Valleyview for 42 years, have always loved the setting, the privacy, the peace and quiet and want to defend this.
