Dear Mayor and Council,

I oppose the Variance Permit Application No. VP100619 for 700 Kinsmen Place. I live at 650 Tay Crescent, so I live almost directly behind this property. I oppose this application for the same reasons City Planners outlined in the Citizen article (<https://www.princegeorgecitizen.com/local-news/proposed-office-building-in-prince-george-facing-city-hall-roadblock-5509206>). We need an official community plan that does not encourage urban sprawl and a plan that centralizes downtown. However as a resident I would love to see developments on that lot that encourage community. If there is any way possible to encourage this lot to be infill housing (I know this would require a zoning change, which I would put my strong support behind), or a mixed residential / commercial development. We need more housing in the core of the bowl to prevent urban sprawl and I would be so happy to have apartment building, seniors housing, or other mixed housing in my neighbourhood.

I would be happy to provide further comment if needed.

Warmly,

Jenn Matthews
