Regarding the rezoning of the property at 7171 Hart Highway, I entirely and whole heartedly disagree with the planned revised use of this property. There are plenty of multi family residential properties in the Hart community. These properties need to be developed. The subject property is prime commercial property and should be developed into commercial properties. The existing zoning is 100% correct for its use and I fully support developing it under its current land use plans. I emphatically disagree with developing the property to allow for multi-family apartments. It will be a complete eye sore for the city of Prince George and should not be what people see driving into town.

Sincerely,

William Hoban
