Subject: Foothills development request for reduced parking for complex

Now living in a strata complex for three years I see the problem every day with not enough parking for home owners and guests. Although we need more developments like this we are setting up the future inhabitants with increased frustration that on occasion can boil over in the public domain.

Enough is enough, it has been two years and the development plan is also two years old...I think there should be no variance in this regard.....the guidelines for parking are already in place when you plan to develop a property. The unwritten guidelines seem to continue to be to come back to council every time for this or that....

No to approving this variance!
