Subject: Homeless solution

Good Afternoon

Been following the issues with our homeless citizens in Prince George. 1st avenue is a disgrace. I might be so bold as to offer up a solution. The city has a large empty building with showers an toilets an this building could house a whole lot of people if we put in small rooms with a single bed an dresser only. Fill in the pool an put up these small rooms. Makes no sense to spend millions taking this building down when we can use it now to solve our problem. No matter where you move them to you will have to supply water,toilets,electricity an living in tents in our weather is inhumane. We can do better. Something to think about.
