Opposed to this application.

The infrastructure for a facility is just not there. All homes are on wells and septic systems in the area and my home must truck water in 3-4 months of the year. a facility of this type will push that to full time water hauling. The access to Grouse road via Haldi or Bunce to Haldi is not commercially capable for daily driving of shift workers and will lead to the facility being left in states of abandonment with youth unlooked after for days at a time. This month alone haldi rd and area experianced power outage for almost a 24hr period with road closure.

I encourage Mayor and council to drive to address suggested and im sure what is being expressed will be more clear. A facility in the area has already been turned down and infrastructure has not changed only been strained farther by further expansion of family homes.

Josh Derhousoff
10080 Haldi rd.
