Hello,

I have a few important questions that I need answered regard this subject.

1. Who will be paying for these modular buildings? And paying for their ongoing maintenance.
2. How does an individual become eligible to live in the unit?
3. Who will be installing the units? Will it be city workers? If it will be city workers, will there be police presence to ensure their safety? If no police presence will city councillors be there to ensure the safety of these workers?

Ambulance and fire do not enter without police escorts. As the city councillors of Prince George you better ensure the safety of your city workers if they are subject to working on this project.

I look forward to your timely response.

Regards,
Erin
