

Types of Open Fire

CATEGORY 3

A “category 3 open fire” means a fire that burns:

- material concurrently in three or more piles, each not exceeding 2 metres in height and 3 metres in width,
- material in one or more piles each exceeding 2 metres in height or 3 metres in width,
- one or more windrows each not exceeding 200 metres in length or 15 metres in width, or
- stubble or grass over an area exceeding 0.2 hectares.

Establish and maintain a fuel break around each pile, windrow, or grass or stubble area to be burned.

If the fire spreads beyond the fuel break, the person who lit, fueled or used the open fire must:

- carry out fire control immediately,
- extinguish the fire if practicable, and
- report the fire to a ministry official, peace officer or fire emergency response agency as soon as possible.

Anyone lighting a category 3 fire must first obtain a burn registration number by calling **1 888 797-1717**.

Ensure you comply with the Environmental Management Act and Open Burning Smoke Control Regulation.

Do not burn when venting conditions are poor or fair.

Ensure someone is always monitoring the fire so it doesn't spread beyond the fuel break. At least one person equipped with a fire-fighting hand tool must monitor the fire at all times.

A person who lights, fuels or uses a category 3 open fire on a burn area must ensure that the category 3 open fire is extinguished by the date specified by the official or person who issued the burn registration number.

Anyone found in violation of an open fire prohibition may be fined up to \$1,150. If your fire escapes and results in a wildfire, you may be fined up to \$1 million, be sentenced up to 1 year in jail as well and be responsible for all fire fighting and associated costs.
