Hey Ethan,

Thanks for reaching out! You can definitely send this into the committee. If you need any other info about the container feel free to reach out.

Thanks again,
Christopher Grilz

Hi Christopher,

A Councillor passed along this message to me.

I wanted to touch base with you about if you are comfortable with me providing this to a Bear Advisory Committee that Council is considering establishing.

They will be reviewing options and creating recommendations for Council, and this seems relevant to what they may be considering.

Are you okay with this appearing on a public agenda for the Bear Advisory Committee?

Thank you for the information and let me know if I can refer this to the Committee.

Thank you,

Dear Members of the Prince George City Council,

I hope this message finds you well. I am writing to propose that Prince George adopt the bear-proof garbage cans that are currently used in Squamish. These cans have a simpler locking mechanism that does not freeze in winter, unlike those previously trialed in our city.

Squamish's bear-proof cans have proven effective year-round. Adopting this model would enhance our efforts to reduce human-bear interactions and improve overall safety and cleanliness.

I believe this change would greatly benefit our city and demonstrate our commitment to practical and innovative solutions for wildlife management.
