Hello, I would like to show for the record I am opposed to rezoning of 6700 southridge. My privacy would be impacted by a four story complex looking directly into my back yard. I would support redevelopment for single family or duplex structures not a big square box that belongs on a camp site. This developer has built units across the street with a box development and a parking lot. These units are rentals only and built with profit in mind not long term durability and occupancy. Developer has not totally finished fist building and the second one under construction for 2 years with very very slow progress. Please deny this project or change to single family. Thank you
