Dear Mayor and Council

I have lived in College Heights for over 20 years. My family enjoys all the green space and we utilize it daily for walking and exploring. We are very against the rezoning and building of apartment buildings in our neighborhood. Our Redacted lives in the College Heights residential park. It took us two years to find a home to purchase him to live in. My Redacted so requires quietness, calmness, and stability etc. We chose the park for the quietness, greenery he would be close to us and in a place that they can afford. Building apartments essentially in his back yard is going to have a detrimental affect. Redacted enjoys spending time in his backyard. The proposed apartment building will take away Redacted peaceful enjoyment and increase Redacted. It will add hundreds of more cars, more people, more "stranger danger", exhaust and pollution in his backyard. Redacted Southridge is already at maximum capacity. Have you even considered what that means when adding more "multi family" dwellings? The traffic situation has worsened with the already added apartment buildings. Adding more will only increase this. The families of College heights moved here for a reason. We love our neighborhoods and all the green space. We NEED the green space. It's not just beautiful to look at, it is needed for physical and mental health. Please do not take this away from us. We were against the other apartments that were built and you built them anyway. Some things are more important than money! When will the tax paying citizens of College heights be listened to?! I'm begging you. Please do not allow apartments to take over our green space. Please!

Sincerely,  
Lori Kelley
