Subject: Proposal to consider traffic circles in Prince George

To the Mayor and City Councillors,

For inclusion on the Council meeting agenda

I just finished watching this video on the situation with traffic circles in the city of Carmel, Indiana, which has a population of 100,000, slightly larger than Prince George. I encourage you all to watch it and consider the practicality of introducing these amazing things to the city's future planning. This is a no-brainer, as far as I can tell, and I think you will agree.
