Subject: water usage

Some people who received this message don't often get email from **Redacted** [learn why this is important](#)

Dear Mayor and council members,

I am writing to you with my concerns about irresponsible water usage. In these times of drought, fires and climate change, we require new and innovate practices.

First, there needs to be incentives for people to move away from grass lawns to more native plant species in their yards that don't need as much watering as lawns.

Next, the watering of park grass areas, golf courses, and private lawns is irresponsible water usage. I am asking for this outdated practice to stop immediately.

Lastly, I would like to say that all bodies of water need special protection from industry, homeowners and businesses, to avoid contamination from pesticides and other chemicals that damage, kill, cause disease to wildlife and plant species.

I would like this to be brought to a council meeting and discussed.

I await your response eagerly,

Heather Erxleben
