Subject: 2025 Coastal GasLink Summer Activity Update

Good morning,

With mechanical completion of **Coastal GasLink Phase 1** achieved in November 2023, we continue to focus on safe and reliable operations of the pipeline system. The final post-construction activities are nearly complete.

Our workforce has been progressing the following scopes of work this summer:

- Site reclamation at Huckleberry Lodge is expected to be completed by September 2025.
- Standard maintenance work will be conducted across all project sections.
- Monitoring of the right-of-way for effectiveness of Erosion and Sediment Control continues.

Please see attached for a copy of the Coastal GasLink 2025 Summer Construction Update.

Cedar Link Project Update

To support Cedar LNG – the world’s first Indigenous-majority-owned LNG project – Coastal GasLink is currently progressing construction on the Cedar Link Project. We are pleased to introduce our Prime Contractors supporting this project who have helped us achieve 24% completion to date.

Please see attached for a copy of the Cedar Link 2025 Summer Construction Update.

Thank you,

Coastal GasLink
