Re: Downtown Prince George Security Camera Pilot Project Update – September 17, 2025

Since the last update provided on August 20, Downtown PG has continued to make progress on this project.

- The three locations for the pilot project have been chosen.
- All relevant business and property owners have given us consent to use their space as well as their power and wifi.
- A camera provider has been selected and I am currently waiting for quotes from electricians to determine how much the install will cost.
- To maximize the potential of this pilot project, I would like to purchase 13 cameras; however, depending on the install cost \$40,000 may not be enough to cover this project the way I would like to see it done.

Next steps include:

- Create a final budget once quotes are received and determine how many cameras can be purchased with the existing budget.
- Sign agreements with the included businesses.
- Order cameras and book the installation.

As previously stated, the goal is to have these cameras up before we get snow; however, as with everything we will be at the mercy of the camera provider and the installer's schedule.

Sincerely,
Chrisie Berry
