

We are not in favour of the RM1 zone. This proposal will take away the rural beautification of the rural setting. It will take away from the beautiful skyline that we enjoy.

Allowing RM1 zone will have a negative impact on the neighbourhood. The number of units from the subject property presents a higher volume of traffic exiting and entering Chief Lake Road. Chief Lake Road being a narrow road with no turning lanes or shoulders poses a safety hazard. Multi family units are located in walkable neighbourhoods close to transit. The added volume of vehicles will add to congestion. No consideration was added to the fact that there is no adequate public transportation, sidewalks or footpath. There is no safe place for school children to be loaded for transportation to schools.

The extra traffic will put the children that have to walk to school at risk, with the added congestion.

Single family dwelling is permitted in area and the rural setting is what we all enjoy.

We do not feel that these apartments / rowhousing will be an asset to this area. This area is known for its greenery and larger lots. We welcome the development of single family dwellings.

We are long time residence in area.

Thanks for your time

Darryl & Rita Kyte
