Request for In-Kind Municipal Infrastructure Support

Dear City Council, On behalf of the Northern Peer Guardians (NPG), we are writing to respectfully request in-kind municipal infrastructure support to assist in our ongoing outreach and overdose response efforts within our community. NPG is a peer-led organization committed to harm reduction, community safety, and supporting individuals impacted by the ongoing toxic drug crisis. Our team provides essential outreach services, including the distribution of life-saving supplies, education, and rapid overdose response. As our work continues to grow, we are facing significant challenges related to the safe and secure storage of outreach and overdose response materials. These items include naloxone kits, harm reduction supplies, and other critical resources that must be readily accessible to effectively serve our community. We are requesting access to municipal infrastructure, such as a storage unit, facility space, or other suitable in-kind support, to safely store and organize these essential supplies. Having a stable and secure storage solution would significantly enhance our ability to respond quickly, operate efficiently, and ultimately save lives. We believe that this request aligns with the City's commitment to public health, safety, and compassionate community response. By supporting NPG in this way, the City would be directly contributing to frontline efforts addressing the toxic drug crisis. We welcome the opportunity to discuss this request further and explore how we can work collaboratively to strengthen community support systems. Thank you for your time, consideration, and continued commitment to community well-being. Sincerely,

Sarah Ferrey
Northern Peer Guardians
