Hello I am writing to you in regard to vp 100565 for 2855 14th ave. I believe these variances should not be approved. My house is on Freeman (backs on to new development) and these variances would have a direct impact on my property and privacy. These units already look directly into my back yard and i do not want them any taller, also if allowed to have a set back of only 1 meter it would only amplify the issue. Parking needs to remain at 61 spaces so people do not block alley and streets, especially during winter months for snow plowing. I built this house in 1975 and still live there and i hope council will respect the requests of us long term residents of this area. Thank You Ron Powar 1475 Freeman st Prince George BC, V2n5a4
