

Letters of Support for Variance Permit No. VP100566

Glen Blair
886 Alward Street
Prince George, BC
Redacted

Feb 9th 2020.

Hello Neighbor

My name is Glen Blair and we own 886 Alward Street. We would like to inform you that we want to replace the old garage on our property with a new garage this year. We will be tearing down the old garage, and replacing the garage with a proper foundation on the exact same spot. The style of garage we would like to build is similar to the shape and style of the existing garage. However, we need a variance to be closer to the property line than building permit application indicates which is 4 feet. We need to apply for a variance of 2 feet to meet our existing garage location.

As a result, we are going to apply to the city for a variance so we can build a garage in the same character as the house and the Crescents in general. We need the support of our neighbors to build our garage and so would appreciate your support in passing this variance.

I, Kathy Gressman at 877 Alward St support the replace the existing garage in the same location as the old garage at 886 Alward Street and do not have any problem with the location variance that is being applied by them.
