

Mr Lynn Wiebe. I am writing in regards of the Harmony House on zelkwas Avenue. The church and BC housing went through two readings before we knew what was going on in our neighborhood. Then they blamed the pandemic on not notifying us of this which I think is crap. If it wasn't for a concerned church member that stopped in front of my house and told me what was going on that have no clue so right away I notified the neighbors and we started working on it. I understand that there's a need for this kind of place but not in our neighborhood because it is too small no parking no sidewalks and where are they still called children supposed to play with the drunk and alcohol women natives they say only. The Trinity Church parking lot is busy all the time taking up spaces from the strip mall letting them park in the parking lot where are all of these vehicles supposed to park plus the daycare plus the music lessons what are our streets going to become. And my biggest concern is this building is going to be three stories high which will block my total view across the street in many ways and I will have people looking down into my windows from across the street which I am totally against it in every way of the matter. There is a school just down the road off of 5th behind the other Church that is vacant which has a fenced in total field with playground area for children all they have to do is pick that up a little bit and they would have a perfect place for them which sidewalks and walking distance of everything.. and after finding out that the church is going to give them a 60-year lease and after 60 years the church will take over the building after the taxpayers have paid for it
