

Hello, I am 17-year-old Joel Tessier and I am writing in regards to the harmony house being proposed from the church across the street from my house which is at 611 zelkwas, for the past 10 or so years I've lived in peace and have never had any problems with this neighborhood but since I've heard about the project to build a 3-story building, I've been thinking how this may affect how I or future generations may live and have effect on this neighborhood. firstly, since it's a 3 story building your basically able to see everything in people's backyards and the people who go there may get some insight from up there and rob our houses while we are gone at the store, and as well its going to be an eyesore from our living rooms and as well they can look into our houses and breech our privacy which is uncomfortable it would be as if this building is watching you 24/7, secondly the parking lot for the church and the daycare will get full and they will fill the streets and teenagers with L's and are learning to drive pose a risk to hitting parked vehicles it if not careful and seeing as how much insurance is for teens, thirdly this housing building is meant for drug and alcoholic addicts which means they will do drugs in the local park which we walk our dogs and they can step on needles and could go threw shoes and increase in alcoholics walking around the neighborhood and pose a hazard of getting hit by a car that's speeding, fourthly when we go to sell our house it will become extremely hard to sell our house and if it does sell it will be for cheap, lastly I believe if this housing was placed else where instead of here like the hart or college heights area it may benefit more as there's multiple places to buy liquor around here. Redacted Redacted and finally this place benefited the church and Redacted only so if they were to open this place elsewhere instead of here I for one would be glad as well as the rest of this neighborhood that is all for now

-Joel
