

Mayor and Council

In regards to the Harmony House we the neighbourhood are against it being built!

Our neighbour and my husband and myself went and spoke to every neighbour that's over 100 homes and informed them what was going on in August when we found out, this was after the second reading.

You gave no regards to us at all.

We had no input.

We have gotten only 4 people that want it. Ironical how none of them live close by. They all live 2 blocks away. Perfect for them. I live across the street.

Because there are a lot of elderly in the neighbourhood they asked us if we would speak for them and let them know all information.

We do have a few houses that are vacant as the homeowners have passed away recently that I noticed Harmony house rep went to and left info. So the numbers are down.

I challenge you to go door to door and take a poll to see how many are for this complex.

After talking to the neighbours myself I would say 90% are against the complex.

I will be home waiting for your representative to take my opinion on this.

In the zoom meeting you say only 5% asked about property values.

We are all concerned about:

Drugs Privacy, Parking, Noise, Theft and undesirable people coming into the neighbourhood.

I understand only 12 groups checked into the zoom meeting on Dec 3 2020, But we are the voice for our friends that live here.

Thank you

Amanda

Mayor and Councillors

There are places like in Farmington BC that women in need from substance abuse can go to.

These institutions are away from mainstream society.

All treatment is done on-site away from outside influences.

This is what the women need, not a neighbourhood institute.

We are too close to everything and the people that put them into this situation.

With these women come family and boyfriends that will bring an undesirable element to us.

We are going to be in a fish bowl

We will be watched 24 hours a day for when we leave our homes, and they can break in.

I don't want my children to feel threatened by what we all know is coming to our neighbourhood.

Our neighbours who has been here for over 40 years is frightened. And we have several of them.

We look out for our neighbours our friends.

As most of them are not tech savvy.

So when the zoom meeting came about and due to Covid they couldn't come over. We took all the information to them explaining what happened.

Last week we received from Harmony House information again. A lot of the information in there was incorrect.

We don't support a multi family complex going in on these lots. If you kept it to single family I believe the neighbourhood would welcome this instead of what is being pushed down our throats.

Our lives matter too!

We live here you don't!

How would you feel living across the street from this?

I believe there are several households that can answer that for you.

We are going to lose all around.

Our equity in our homes! Our privacy!

Our sense of freedom! Our parking!

Our sense of security!

The whole neighbourhood is about to change. It won't be the jewel that we all know living here.

You should be ashamed of yourselves for pushing this on us.

No one told us anything about this project.

Shame on all of you.
