I read the info related to development of this lot. My concern is water diversion. Water has memory and every time the city has developed areas around this end of Ospika my house on Baker is affected. I was promised that when Ospika was put through, around 1990's, water would be diverted. It was -into my basement. Every time a lot is developed again the city has foolishly thought they could divert water. As a result my house is seriously affected. Some remedial work has been done in my home and lot but ultimately I have accepted that my death will be the only way I can escape the city's incompetence in this matter. Fortunately I am 75 so the situation will soon be resolved for me although my executors will be left with problem.

I see no mention of water in report.

Mary Applegate
4229 Baker Road.
